

How Stitch & Sew is Organized

COMPUCON designed Stitch & Sew software with Home Embroidery users in mind. The #1 consideration was to make the software easy-to-use.

Basically, there are three distinct functions associated with embroidery design:

1. **Digitizing**
2. **Lettering**
3. **Editing**

Therefore, the Stitch & Sew screen is set up to be clean-and-simple:

Note

The icons and toolbars will reflect the level of Stitch & Sew that you (currently) have. For example, only when you have Digitizing – the Digitizing toolbar appears.
